LYDIAN BOLD CONDENSED

The devotees of slimness will welcome this distinctive, dressy design by the well-known calligraphic artist, Warren Chappell. This is not a mere narrowing of popular Lydian Bold, but a consistent original conception of broad-pen lettering in restricted width, with remarkably open counters and vigorous freedom in the curves. Close-set or letter-spaced capitals in display sizes up to 72-point have a noble dominance that comes as a rich relief from monotone sans serifs. Yet in the book sizes, even as small as the 10-point, readability is unsurpassed by any other condensed face.

American Type Founders

200 Elmora Avenue, Elizabeth B, New Jersey

Lydian Bold Condensed is immediately available from stock at all ATF Branches. The new companion Italic is now in production for later delivery.

TYPE PRICE LIST

Prices are subject to change without notice

The Alphabetical Price List tabulates all type presently supplied in job fonts or quantity fonts. Omission from this list of type faces shown in previous price lists is an indication that they are no longer available, except in foundry lines of each character desired (see Schedule 10009).

PRICE LIST INFORMATION—Listing for each series shows design name and identification number, also code word which may be used in place of name and identification number when ordering type by wire. Title-line faces have a code word for each size. Point sizes appear in the first column of each listing. Sizes printed 6-2 or 12-56 should be read "6 point number 2" or "12 point number 56." Sizes printed 18/24 or 120/96 should be read "18 on 24 point" or "120 on 96"—the first figure indicating the size of the face, the second indicating the size of the body.

Information given in each price listing for job fonts reads as follows:

- Point Size, Classification, Table Letter
- Schemes for Caps, Lowercase and Figures
- Number of 6" Lines
- Approximate Weight
- Prices of Separate Packages
- Price of Complete Job Font

TYPE FONT SCHEMES—Revised schemes have been made for all job fonts of type. All fonts manufactured hereafter will be made up with caps, figures, and lowercase packaged separately—to permit the printer to order in proportions better suited to his needs.

The number of cap A's, lowercase a's and figure 1's shown for each size in the alphabetical price list refers to the table of schemes for job fonts (see Page 44) to permit an approximation of the other characters included in the font. Every font consists of full six-inch lines of type and contains the minimum number of each character the scheme demands. Added characters are in EXCESS of scheme, put in to make lines complete. Punctuation marks (points) are packaged with both cap and lowercase fonts. Periods, commas, hyphens and dollar marks are also included with figures.

TYPE CLASSIFICATION—The superior figures 1² or 2 following a size designates availability of that size as follows:

- CLASS 1—Faces and sizes in most general demand. These are stocked in all but a few branches for over-the-counter service.
- CLASS 2—Faces and sizes for which the demand does not warrant stocking in branches. These are available from Elizabeth.
- CLASS 3—Faces and sizes, sales of which do not justify the maintenance of stocks. These can be supplied from Elizabeth without assurance of immediate delivery.

UNCLASSIFIED FACES—The manufacture of any faces or sizes not included in this price list has been discontinued in fonts, but any type for which matrices are available may be ordered in foundry lines of each character desired. For prices, refer to Schedule 10009.

PRICE CLASSIFICATION—Tables K, L, M, N and W are printed as a master schedule of pricing information for the use of billing clerks.

Table K covers standard scheme fonts made in a uniform number of 6" lines. Tables L, M, N and W facilitate pricing these fonts of certain sizes where standard schemes require variations in the number of 6" lines.

IDENTIFICATION OF TYPE FACES—If possible, always send sample cap "H" and lowercase "n" to the Foundry Order Department when unidentified faces are to be matched. If matrices are in existence, type supplied will match exactly the sample supplied insofar as body, set and alignment are concerned. However, the nick may differ because the original mold was worn out and discarded. Pin marks on most type have also been discontinued.

Multiple nicks on type have been discontinued, in sizes larger than 12 point, by nearly all type foundries. However, ATF will continue to put in special identifying nicks on such faces as 18 and 24 pt. Wedding Text, where two sizes are made on one body. Type fonts produced on modern casters are not guaranteed to match nicks carried on fonts of the same faces more than ten years old. Standardization of nicks was necessary to facilitate ready availability of types in urgent demand.

QUANTITY FONTS OF BODY TYPES—To provide a better scheme for use as body type, a limited variety of faces and sizes is supplied in Quantity Fonts, weighing approximately 10 or 20 pounds each. Exact weights vary and are not guaranteed. These are detailed in the Alphabetical Price List and are briefly listed below for ready reference:

- Caston No. 540—10 pt.
- Century Expanded—8, 10 pt.
- Century Oldstyle—8, 10, 10-2 pt.
- Century Schoolbook—8, 10 pt.
- Goudy Oldstyle—10 pt.
- Modern Roman No. 64—6, 8, 10, 12 pt.

- Ronaldson No. 551—6, 8, 10, 12 pt.
- Ronaldson Italic No. 551—6, 8, 10, 12 pt.

No type is now sold by the pound, either in weight fonts or when cast to order. All regular type, typographic accessories, spaces and quads, etc., are priced by the font, package or foundry lines.

SCRIPT FACES—18 pt. Typo Script, Typo Script Extended and Commercial Script are now made on square bodies. Other scripts will be converted as time permits. In the past, fonting schemes for script faces originated by old foundries varied widely. Some fonts contained special "script" spaces, no longer used in modern practice. These have been eliminated and all fonts produced hereafter will be fonted to standard schemes shown in table on Page 44.

TYPEWRITER FONTS—These have been standardized and will hereafter be made up to a special uniform scheme, affording a suitable assortment of characters for facsimile typewritten work. Justifiers (spaces) for typewriter faces are sold separately (see Schedule 10007, Page 38). Typewriter fonts are detailed in Alphabetical Price List.

ADCUTS, IMPRINTS AND LOGOTYPES—These may now be purchased in foundry lines (see Schedule 10009, Page 41).

LINING FIGURES—Supplied with all job fonts of type except CASLON 471 and CASLON ITALIC 471, GOURDY ITALIC and GOURDY CURSIVE, PIRANESI and PIRANESI ITALIC, PIRANESI BOLD and PIRANESI BOLD ITALIC.

OLDSTYLE FIGURES—Fonts are available as shown on Page 39. Other Oldstyle Figures must be cast to order in foundry lines (see Schedule 10009, Page 41).

ACCENTED CHARACTERS in fonts will be out of production for stock until a complete revision of this line can be accomplished. Work is going ahead on this project, made necessary by our being compelled to dump as old metal many thousands of fonts that had been held for occasional orders as long as forty years. Evaluation of potential demand and selection of fonts to be manufactured is a tremendous task, but in the meantime any accented character for which we have a matrix will be cast to order in foundry lines in accordance with Schedule 10009, Page 41.

FOREIGN LANGUAGE TYPES in fonts, for which there was always a very limited demand, have been discontinued for economic reasons. However, we will be glad to cast foundry lines of any Foreign Language character for which we have a matrix. For information regarding availability and prices, address Type Merchandising Department at Elizabeth.

SPECIAL NICKING AND CUTTING—A special charge of 25 cents per nick per 6" line will be made on all orders requiring special nicking. An additional charge of 10 cents per 6" line will be made on any orders for cutting type down to special height.

SPECIAL HEIGHT, Base Height and 3/4-inch Spaces and Quads are cast to order in foundry lines only (see Schedule 10009). Spaces or Quads can be shaved down at the Foundry to desired LOWER heights at extra cost of 10 cents per 6-inch line in addition to regular cost of material.

INTERMEDIATE SIZES—5 1/2, 7, 9, 11, 16, 20, 22, 54 and 66 point Spaces and Quads are not put up in fonts or packages. These and larger sizes—84, 96, 108 and 120 point—also Angle Body and Script Spaces and Quads—are supplied in foundry lines only.

OLD METAL ALLOWANCES—Ask your ATF Branch or Salesman to quote current allowances for Old Foundry Type and other Old Metals.

Important Notice

When a new font of type is to be laid in the case, first pull a proof of it, to identify strange characters and to prove any claim for damaged or missing letters.

Decorative Material

Inventory production of Typographic Borders in fonts and miscellaneous Ornaments and Typecuts shown in old specimen books (excepting those items listed on Pages 38 and 39 or in Handypacks) has been temporarily suspended until a complete revision can be accomplished. The best of our old favorites, along with new decorative material, will soon be available at more favorable prices made possible through quantity production. Most of our older typecut designs had to be made on hand-operated casting machines and finished by hand labor. New matrices to work on automatic casting machines have to be prepared before these are restored to production. This work could not be done during the last few years when the Foundry was struggling to fill one-quarter million back orders for type that accumulated during the war and at the same time take care of current demands.

While new matrices and fonting arrangements are in preparation, the Foundry will cast to order from existing matrices any item desired, if the customer is willing to accept the minimum that can be produced without manufacture for stock (a "foundry line" of six lineal inches, the standard unit of production). For obvious reasons, it is impracticable to take one or two pieces of type from such a line and place the rest in stock or discard them. If a two-color cut is desired, two foundry lines must be made, on two separate casting orders, one for each matrix used. Therefore, foundry lines cast to special order are not returnable for credit. For a fuller description of this service, please turn to Page 41.

ATF Handypacks

These make available a wide variety of decorative Material, carried in stock at all ATF Branches. 96 assortments of useful designs, foundry-cast in long-wearing, easy-to-use Typecuts, are displayed in a separate catalogue now being printed. If you would like a copy of the ATF HANDYPACK CATALOGUE, address your request to Type Merchandising Department at Elizabeth, or ask your ATF Branch or Salesman.

TABULAR QUADRULES—Typecast material for ruled blank forms. Tabular Quadrules are more economical than separate quads and rules, are composed more rapidly than the separate materials, giving a form that is solid and more accurate. The face of Tabular Quadrules is 1/4 point and matches brass or metal rule with 1/4 point face. Bottom shoulder is the same as level of 2 point rule with center face.

Tabular Quadrules are cast on 12, 18 and 24 point bodies, in 12, 18, 24, 30, 36, 48, 60 and 72 point widths. Packages weigh approximately 5 pounds.

Matrix Preparation Service for Adcuts and Special Typecast Products

CHARGE FOR SPECIAL MATRICES—On initial orders for Adcuts, Imprints, Logotypes or any special letters, figures, etc., requiring the preparation of new matrices, there is an extra charge which corresponds to the tool charge encountered in other industries.

Since matrices for ATF typesetting machines cannot be used anywhere except in the Foundry at Elizabeth, they are not delivered to the customer (where they might be subject to damage or loss) but are retained in our Matrix Vault, properly catalogued and protected, for exclusive use of the customer who paid for them. No castings are made from owner's matrices without his express permission.

Due to infinite variety of detail required in matrices, a flat price schedule is impracticable. Generally the charge will be within the following range but, if the customer desires a fixed quotation, copy drawings should be submitted to the Foundry Order Department at Elizabeth for a set price.

1. Matrix charge for single letter, figure, or simple design	\$ 12.50
2. Matrix charge for two- or three-letter logotype or trade-mark	16.75
3. Matrix charge for design including four to nine letters	21.00
4. Matrix charge for design including ten or more letters	25.00
EXTRA CHARGE FOR SHADED DESIGNS OR INTRICATE DETAIL IN ARRANGEMENT OR BACKGROUND	10.00

It will be noted that the foregoing schedule imposes no conditions regarding size. A plain single-letter matrix, either 6 point or 72 point size, would cost \$12.50. The maximum charge would be \$25.00, unless it required fine shading lines, mortising, multiplicity of lettering or intricate detail.

MORTISES—Adcuts may be cast with square or rectangular mortise not less than 14 points on each side. ADD \$12.50 to matrix charge on initial order. ADD 25 per cent to Table E-1 prices for Foundry Lines of mortised characters.

MAXIMUM WIDTHS—The maximum set widths for Adcuts or other foundry products made on typesetting machines are as follows:

MAXIMUM SET OF ADCUTS					
Point Size	Maximum set in Points	Point Size	Maximum set in Points	Point Size	Maximum set in Points
3	96	16	240	54	340
4	96	18	340	60	360
5	96	20	340	72	340
6	240	24	340	84	288
8	240	30	360	96	360
10	240	36	360	108	360
12	240	42	360	120	360
14	240	48	360	144	360

DEFINITION OF "ADCUTS"—Adcuts are reproductions—on point system bodies, the same as Foundry type—of signatures, trade-marks, illustrations or similar subjects.

Adcut matrices which can be reproduced from customers' designs without special work on pattern drawings or patterns will be made under the conditions outlined herein. Quotations should not be made without referring details to the Foundry Order Department, except on simple block designs including no more than 30 letters which will be at least 5 points high when reduced.

Copy drawings furnished by customer should be finished art work delineating in correct proportion every detail to be reproduced. If copy submitted is unsuitable, Foundry Order Department will submit, to the customer, estimated extra charge for necessary art work. Final copy drawings must be approved by customer BEFORE matrix engraving is made.

Adcuts may be made for multiple-color printing and will register perfectly. Matrices for each secondary color are priced the same as for one-color Adcuts and castings therefrom sold in full Foundry Lines, the same as other characters.

Small Adcut designs for which matrices exist cannot be cast on extreme set widths, such as Red Feather emblem, 8 point body, to be placed on a 12-em slug for use as newspaper dashes. A new matrix is required but the cost will be no more than that for the matrix to cast type on normal set width.

IMPRINT LOGOTYPES—These can be made from any ATF type faces listed in the Alphabetical Type Price List, in sizes 36 point and smaller. A logotype is any combination of letters, points or figures which can be assembled from type and reproduced with an electrotyped matrix. Matrix charges are identical with those for engraved matrices. Example: Matrix charge for any of the following logotypes (more than 9 characters) is \$25.00.

SCHEDULE 10009

Typecast Products (Sorts) in Foundry Lines

DEFINITION—A "Foundry Line" comprises as many type, cast from one matrix, as can be placed in a 36-pica line.

Above cut is 42 point body and 58 point set.

Foundry Line = 432 points. Example: $432 \div 58 = 7$ type.

Determine set of type or cut and use table to find quantity possible in one foundry line. Order lines required for number of type desired.

PRICES FOR FOUNDRY LINES—Any character that may be produced by ordinary methods from existing matrices or from matrix owned by the customer will be cast to order in Foundry lines at prices shown in above schedule. These items include:

- Any type sorts or accented letters for current or obsolete faces.
- Any space or quad—regular, angle-body or script—in any size.
- Any typecast ornament, border unit or corner piece.
- Any trade-mark, emblem or other proprietary device made from customer's matrix.

BODY SIZE GOVERNS PRICE—Types cast on special body, line or set, are priced the same as other type, based on body size, 10 point body bearing 12 point face, for instance, is considered 10 point and foundry lines are priced accordingly.

QUANTITY PRICES are dependent upon number of lines ordered at one time and cast from one font of matrices. Different sizes of the same face or several faces of the same size may not be combined in one order. Quantity discounts do not apply as schedule provides lower unit cost per line with increased number of lines ordered at one time.

The foundry reserves the right to quote special price if order requires modification of matrix or other unusual treatment. Foundry lines are not returnable for credit.

AVAILABILITY—Foundry lines are cast PROMPTLY when order reaches the Foundry, provided matrices are available.

Some typecast products formerly offered in fonts or sets are now supplied only in foundry lines. Slow demand for a wide variety of designs makes fonting impossible at standard prices.

Foundry lines cast to order are not returnable for credit.

SCHEDULE 21000 TYPE FOUNDRY SPACES AND QUADS Precision-Cast in Type Moulds

Spaces and Quads are not sold by the pound. Please order by font or item number.

ATF Spaces and Quads, positively accurate in point-body and point-set dimensions, are free of all defects which result in "springy" lines of type "working off its feet" to cause work-ups during the press run.

SPACES are non-printing types less than one em in set width. Thickener is commonly designated by the number of pieces that add up to approximately one em, as 5-to-em, 4-to-em, and 3-to-em. ATF Foundry Spaces are graduated on the point-set system to quarter points; 10 point 3-to-em Spaces are 3½ points set; 14 point 3-to-em Spaces are 5 points set. 2-to-em is called EN SPACE.

QUADS are cast em-set, two-em or three-em. Sizes smaller than 14 point contain all three; 14 point to 24 point do not contain three-em Quads. Larger sizes are em Quads. STANDARD HEIGHTS of Spaces and Quads vary according to point-body sizes, as shown in table "Heights of Spaces and Quads." These are the heights in all fonts and packages bearing Schedule 21000 numbers.

SPECIAL HEIGHT, Base Height and 7-in Spaces and Quads are cast to order in foundry lines only (see Schedule 10009). Spaces or Quads can be shaved down at the Foundry to desired LOWER heights at extra cost of 10 cents per 6-inch line in addition to regular cost of material.

INTERMEDIATE sizes—5½, 7, 9, 11, 16, 20, 22, 34 and 60 point Spaces and Quads are not put up in fonts or packages. These and larger sizes—84, 96, 108 and 120 point—also Angle Body and Script Spaces and Quads—are supplied in foundry lines only.

Accurate, clean, undamaged Spaces and Quads, in plentiful supply, cost very little in the long run, but save valuable time in composition, lock-up and presswork.

Ancient, battered Spaces and Quads, turned in as old metal, will pay about one-third the cost of new material. New Spaces and Quads will increase operational efficiency in any letterpress plant.

ATF DURATIN LEADS AND SLUGS

Definition—Leads are strip metal spacing material; standard body sizes, 1, 2, 3 and 4 point. Slugs are the same material in body sizes 6, 8, 10 and 12 point.

Formula—ATF DURATIN Leads and Slugs are 84% lead, 12% antimony, 4% tin. This is the standard slug-casting machine metal formula. ATF DURATIN products can be used on a non-distribution basis and remelted with casting machine slugs without the addition of toning metal. DURATIN formula is virgin metal—not reclaimed lead cables or other scrap material. DURATIN "sweetens the pot" instead of jeopardizing the integrity of remelted metal.

How Supplied—DURATIN Strip Leads or Slugs are supplied in 24-inch strips which the user can cut to desired lengths. Cut-to-measure 2 pt. Leads or 6 pt. Slugs, packaged in 2-pound minimum units, are stocked at Branches in sizes 4 to 9½ ems, by half-picas, and 10 to 36 ems by even picas. Other lengths and body sizes are cut to order from strips. Labor-saving 5-pound fonts of 2 pt. Leads and 6 pt. Slugs are stocked at Branches.

Standard Height of ATF DURATIN Leads and Slugs is electrolyte base height, .759". Special heights—.853", .875" and .765" (Ludlow) can be supplied on special orders for production in sizable quantities.

Discounts—DURATIN Leads and Slugs are not subject to quantity discounts inasmuch as price schedule provides lower cost for larger quantities ordered at one time.

QUOTATION QUADS

NEW STYLE

New Style Quotation Quads are cast .759 in. high with closed bottom.

Cast in type molds on automatic machines, these quads are guaranteed accurate. Turned upside down they can be used as electrolyte base. A small rib on the inside of the open end makes them easy to handle with tweezers.

Odd Sizes—Requests for sizes not shown in these lists and smaller sizes, such as 24x10 and 18x10 should be filled with spaces. See "Spaces and Quads."

Supplementary Price List

Fonts to Be Taken Out of Production

NET PRICES ARE SHOWN—NOT SUBJECT TO QUANTITY DISCOUNT.
Orders for fonts listed herein will be accepted until May 31, 1950. At that time accumulated unfilled orders will be scheduled for final production.

Demand for these fonts now averages less than ten per year, which makes fonting in production quantities impracticable.
Matrices will be retained at the Foundry, and sorts cast to special order only.

ATF Adcuts and Logotypes

Print Better—Last Longer—Cost Less—**THAN ELECTROS**

Company or personal signatures, trade marks, emblems, symbols, designs can be cast in type in hard, long-wearing, foundry type metal. These are ADCUTS. Combinations of letters, points or figures can be set up in any ATF type and cast on single-piece bodies. These are LOGOTYPES. They may be firm names and addresses, heads on office or factory forms, imprints, envelop corner cards. They prevent errors on repeated use, reduce costs of composition and assure uniformity.

ADCUTS and LOGOTYPES can be cast in any desired number, and additional castings made any

time from the same matrices, at less than the cost of electrotypes. They print sharp and clean. The finest of lines are free from undercutting; counters are deep. They need no shoulder for tacking; can be trimmed flush with the design to exact point sizes that line up with type. They are the only practical means of dropping snugly into the body text company or product names in their characteristic styles.

Send us a sketch and your specifications for a particular job and let us submit quotation and complete information.
